

Claims

- [c1] 1. A wiring harness arrangement assembly for arranging a wiring harness received in a corrugated tube from a body to a sliding door of a car, wherein a harness guide is provided in a side of the body or of the sliding door, and the corrugated tube is held turnably in a circumferential direction of the corrugated tube by the harness guide.
- [c2] 2. The wiring harness arrangement assembly as described in claim 1, wherein the harness guide has a cradle and a cap which are formed with a pair of the locking projections opposed to each other so that the cradle and the cap hold the corrugated tube.
- [c3] 3. The wiring harness arrangement assembly as described in claim 2, wherein the cradle has a lock means for locking the cap to the cradle.
- [c4] 4. The wiring harness arrangement assembly as described in claim 2 further comprising a locking member and a annular member disposed between the cradle and the cap, wherein the locking member enters the annular member and engages with the groove of the corrugated

tube.

- [c5] 5. The wiring harness arrangement assembly as described in claim 4 wherein the annular member is turnable in a circumferential direction of the annular member between the cradle and the cap.
